SUMMARY

3 years experienced in IT and half of that is on programming. Allways been the practical, solution finder, fast learner and the negotiater one all my life. Most of the time, find myself while translating Turkish to Turkish and solving team members communication problems. Eager to use those qualities in development process as a good member of Frontend Development team.

Interested in **JavaScript, ReactJs, Html, Css with frameworks** and excited to learn full lifecycle of Frontend Development process. Feel comfortable with English speaking, listening and communicating, able to learn from English documents and solve my problems. You can review my projects on my GitHub account and my portfolio page.

After working and improving myself about the Frontend development, gaining Backend skills and to be a Full Stack Developer is my mid term planning.

WORK EXPERIENCE

Accountant Assistant

-Used office programs and accounting softwares.

-Data editing, analyzing and presenting.

-Analyzing the system and giving feedback to the software department.

Freelance Frontend Development Mentoring

-To prepare a road map on software development.

-To help about HTML, CSS, JS, React tasks.

-Helping on CV, Resume, Linkedin profiles.

Frontend Developer At DEDEW Technologies (Current / Part Time)

-Discuss and decide about usex experince and new features.

-Developing new features by using React.js, Redux, Javascript, Css etc.

PROJECTS

To see all of my React and JS projects and github links -> https://medev.netlify.app/

-Blog App : I aimed to create a blog app, anyone can Sign-in, Login, Logout and create, delete, update his-her blog and see all other blogs. Used React.js, Context, Material UI, Css, Firebase, React Router, Formik.

https://firebase-blog-app.netlify.app / https://github.com/M-E-Dev/React-firebase-blog-app

-Todo App : I wanted to create a basic level Redux Todo app. We can add, delete, check, uncheck. Used React.js, Redux, Css.

https://github.com/M-E-Dev/React-basic-redux-counter

-Movie App : With this app we can see top movies, its rating, summary etc and detail page. All the info came from a movie database. Anyone can login via Firebase. Technologies I used : React.js, Context, Css, React Router, Firebase.

https://medev-firebase-movie-app.herokuapp.com   https://github.com/M-E-Dev/React-movie-app

-Recipe App : With this app we can search recipes and see recipe detail page. All the info came from a recipe database. Technologies I used : React.js, Css, React Router.

https://medev-recipe-app.netlify.app   https://github.com/M-E-Dev/React-recipe-app

-Hangman game, Todo app, Find the number game, Ios calculator (Used pure Javascipt and CSS)

Technical Skills

HTML5 | CSS3 | React.js | JavaScript | Redux | Context | Firebase | Axios | Sass | Bootstrap | Material-U | Git | GitHub | Rest API | Linux | VS Code

Soft Skills

Analytical thinking | Problem-solving abilities | Self-motivated | Strong and clear communication skills | Music lover | Instrument player | Social & Nature awareness
